## SCHEDULE

Item No.	Description	Qty.	Unit	Unit Price	Amount
1	Furnish all labor, material and services necessary to design, fabricate and deliver illuminated viewer conforming to the following specifications:	11	each	\$318.00	\$3,498.00
	To present at least 20 inches of seventy millimeter format suitably illuminated for direct viewing and interpretation.				
	The viewer to be mounted on the under side of a work table approximately 40 inches wide by 36 inches deep.				
	The viewer to be attached in such a manner as to present an image through a lucite panel mounted flush within the work table surface. The panel will be approximately centered at or near the edge closest to the operator.				
	To accommodate ten inch reels of seventy millimeter film. The ten inch reels to be mounted on brackets equipped with drag brakes and drive handles located to the operator's left and right. The drive handles to be large enough to easily rotate the 10-inch spools and possess rotating sleeves to avoid blistering of hands. It is recommended that a 3 to 4 inch radius of rotation be provided on the handles. Shafts will be mounted so as to allow for easy rotation of spools.				
	Smooth rollers which will not mar the film material shall be provided for transporting the film.				
	An adapter shall be provided to permit use of special film spools, per sample spool furnished by Government.				

SECRET

Item No.	Description	Q'ty.	Unit	Unit Price	Amount
	The source of illumination to consist of two fluorescent tubes mounted in a suitably designed protective cover and affixed to the under side of the work table in such a manner that it will permit the operator to assume a normal sitting position. The light source must maintain a temperature low enough to avoid damaging the film (120°F.). The light source must be variable by at least two stages to facilitate use of dense and thin negatives.				
	The drawing table shall have a lip at the near edge to retain pencils, etc.				
	Table legs sufficiently sturdy and rigid to allow for extended rugged use of the equipment shall be provided.				
	The table shall be normal height of approx. 30 inches at the front edge and shall tilt upward toward the rear at approx. 30 degrees.				
	All mountings and casings to be sufficiently rugged to withstand extended usage. All exposed wood surfaces to be varnished.				
	The Contracting Officer or his technical representative shall be kept currently informed by informal reports of the progress of the work under this contract.				
	Deliveries under this contract shall be made f.o.b. Washington, D.C. or to a point within the metropolitan area thereof to be designated by the Contracting Officer. Deliveries shall be made in accordance with the following schedule:				
	The first two (2) units (prototypes) will be delivered on or before 5 June 1956. Four (4) units will be delivered within 30 days after approval of the prototype units.				

SECURITY

Description

The remaining five (5) units will be delivered within the following 30 days.

All shipments shall be marked for:  
SPECIAL PROJECTS OFFICER LOT 4230
